20/10 Products partnership with the EPA:
The mission is to protect the health of people and the environment. The program empowers consumers to protect their health and minimize impact on the environment through everyday purchasing decisions.

Specially designed to work with most automatic water-wash exhaust ventilator systems, **G-510EF** breaks down grease and oil, washes away clean.

G-510EF concentrated formula keeps water-wash exhaust hood systems grease-free, and helps maintain systems as required by NFPA-96.

Just add **G-510EF** to your detergent injection system, and let its unique concentrated formula go to work.

To find out how you can use **G-510EF** in your commercial kitchen, talk to your 20/10 distributor or call 1.800.286.2010 for more information

INDUSTRIAL STRENGTH CLEANER/DEGREASER

CONCENTRATED FORMULA FOR ALL

WATER-WASH EXHAUST HOOD SYSTEMS

G-510EF

Cleans and degreases!

Add G-510EF to your automatic water-wash exhaust ventilators for super cleaning! The unique formula breaks down stubborn grease and oil, washes away clean.

Works with all makes of water-wash grease exhaust duct systems.

Ask your distributor or service agent about proper use, dilution and wash duration for your specific operation.

Prevents build-up

Regular use and maintenance according to manufacturer's specification will prevent grease buildup within the plenum chambers and downspouts of water wash exhaust hood systems, in compliance with the standards prescribed in NFPA 96.

Concentrated for extra power

G-510EF is concentrated for super cleaning and degreasing. Dilute for most jobs, or use full strength.

Our Guarantee

G-510EF is guaranteed when used according to manufacturer's recommendations. See your manufacturer's product manual for specific applications, dilutions and warranty information.

When consumers see the Design for the Environment (DfE) label on a product, they can be confident that the ingredients have been through a rigorous EPA review.

When people use Design for the Environment-labeled products they are protecting their families and the environment by making safer chemical choices.

****All products displaying the EPA DfE logo have been Formulated in Partnership with EPA Design for the Environment Formulator Initiative.**

G-510EF is first in our line of products that are DfE** certified. Environmentally preferred products are better for the environment and better for your health. By cleaning with products that are healthier for the air, ground, streams, and lakes (or waterways) there will be fewer chemical contaminants left behind to inhibit your health. This means a cleaner, healthier space to work, learn, heal, or play.

2010 Products is participating in a partnership with government, and in association with others in our industry to understand the limits of safety and performance of chemical products.

At 2010 we are working to educate our distributors, the consuming public, and each other based on sound advice, not sensationalism. 2010 is pledged to learn, develop, and influence others as we move forward.

Sustainable Green Cleaning Products Work Effectively Without Ingredients that are:

Harmful to humans such as:

- Carcinogens
- Nervous systems toxins
- Endocrine disruptors
- Reproductive toxins

Harmful to the environment, such as:

- Phosphates
- Petroleum distillates
- Heavy metals
- Aquatic toxins

A Sustainable Green Cleaning Product is one that performs and has a reduced effect on environmental and human health when compared with competing cleaning products that serve the same purpose.

What is EPA DfE**? The U.S. Environmental Protection Agency's Design for the Environment (DfE) program seeks to promote the use of institutional cleaners and maintenance products with improved environmental and human health characteristics

When you see the DfE logo on a product it means that the DfE scientific review team has screened each ingredient for potential human health and environmental effects. Before DfE allows the logo on a product, DfE makes sure that only the safest ingredients from each class are used.
